# UNIVERSAL PULLER FOR VP COUPLINGS

## Product Bulletin

The **COUPLING PULLERS** is a kit consisting of two pullers created to dismount couplings from all VP pumps (e.g. Ford, Rover, Audi, BMW, Nissan, Opel, Cummins, John Deere, MAN, Nissan, VM, Volvo).

Mechanically, they are easy to use, they allow the application of greater power on the coupling so that it is possible to pull it out from its housing.

This is the only equipment useful for the extraction of VP couplings, otherwise it is almost impossible.
